

2006 Census Teacher's Kit and the 2006 Census ABE/Literacy Kit

This is a free learning resource produced by Statistics Canada for educators. It contains lesson plans on the census: what it is, why it is important and how to use census data. The Teacher's Kit contains ESL activities for elementary and secondary students, while the ABE/Literacy kit contains activities for adult learners.

The order form for both of these kits are now available online at our website <http://www12.statcan.ca/english/census/index.cfm> and choose the ABE/Literacy Kit near the bottom of the form.
